MUHAMMAD ALI JINNAH

Muhammad Ali Jinnah, Muslim statesman who led Pakistan's independence from British India, and was its first governor-general, was born December 25, 1876, in Karachi, Pakistan. In 1906 he joined the Indian National Congress. Seven years later, he joined the India Muslim League. The independent state of Pakistan that Jinnah had envisioned came to be on August 14, 1947. The following day, he was sworn in as Pakistan's first governor-general. On September 11, 1948, he died near Karachi, Pakistan.

Jinnah was born in Wazir Mansion in Karachi on December 25 1876. The eldest of his parents' seven children, Jinnah's mother, Mithibai, was convinced her son would one day achieve great things. Jinnah's father, Jinnahbhai Poonja, was a merchant and exporter of cotton, wool, grain and range of other goods. As a whole, the family belonged to the Khoja Muslim sect.

As a teen, Jinnah developed an admiration for his father's business colleague, Sir Frederick Leigh Croft. When Croft offered Jinnah an internship in London, Jinnah jumped at the chance, but Jinnah's mother was not so eager for him to accept the offer. At his mother's urging, the 15-year-old Jinnah entered into an arranged marriage with his 14-year-old bride, Emibai, in February 1892. He departed Karachi in January of 1893. Jinnah would never see his wife or his mother again. Emibai died a few months after Jinnah's departure. Devastatingly, Jinnah's mother, Mithibai, also passed away during his stay in London.

In June of 1893 Jinnah joined Lincoln's Inn, a renowned legal association that helped law students study for the bar. Over the next few years, Jinnah prepared for the legal exam. While studying for the bar, Jinnah heard the terrible news of his wife and mother's deaths, but he managed to forge on with his education.

In addition to fulfilling his formal studies, Jinnah made frequent visits to the House of Commons, where he could observe the powerful British government in action firsthand. When Jinnah passed his legal exam in May of 1896, he was the youngest ever to have been accepted to the bar. With his law degree in hand, in August 1896 Jinnah moved to Bombay and set up a law practice as a barrister in Bombay's high court.

Jinnah was particularly interested in the politics of India and its lack of strong representation in British Parliament. He was inspired when he saw Dadabhai Naoroji become the first Indian to earn a seat in the House of Commons.

MUHAMMAD ALI JINNAH

In 1904, Jinnah attended a meeting of the Indian National Congress. In 1906 he joined the congress himself. As a member of Congress, Jinnah at first collaborated with Hindu leaders as their Ambassador of Hindu Muslim Unity, while working with the Muslim League simultaneously. In 1912, Jinnah attended a meeting of the All India Muslim League, prompting him to join the league the following year. Gradually, Jinnah realized that the Hindu leaders of Congress held a political agenda that was incongruent with his own. At that stage of his political career, Jinnah left Congress and dedicated himself more fully to the Muslim League. In the midst of Jinnah's thriving political career, he met a 16-year-old named Ratanbai while on vacation in Darjeeling. After "Rutti" turned 18 and converted to Islam, the two were married on April 19, 1918. Rutti gave birth to Jinnah's first and only child, a daughter named Dina, in 1919. By 1928 Jinnah's busy political career had taken a toll on his marriage. He and his second wife separated. She died on her 29th birthday. By 1939 Jinnah came to believe in a Muslim homeland on the Indian subcontinent. He was convinced that this was the only way to preserve Muslims' traditions and protect their political interests. His former vision of Hindu-Muslim unity no longer seemed realistic at this time. During a 1940 meeting of the Muslim League at Lahore, He proposed the partition of India and the creation of Pakistan, in the area where Muslims constitute a majority. To Jinnah's relief, in 1942 the Muslim League adopted the Pakistan Resolution to partition India into states. Four years later, Britain sent a cabinet mission to India to outline a constitution for transfer of power to India. The independent state of Pakistan that Jinnah had envisioned came to be on August 14, 1947. The following day, Jinnah was sworn in as Pakistan's first governor-general. He was also made president of Pakistan's constituent assembly shortly before his death. On September 11, 1948, just a little over a year after he became governor-general, Jinnah died of tuberculosis near Karachi, Pakistan—the place where he was born. Today, Jinnah is credited with having altered the destiny of Muslims in the Indian subcontinent. According to Richard Symons, Muhammad Ali Jinnah "contributed more than any other man to Pakistan's survival." Jinnah's dream for Pakistan was based on the principles of social justice, brotherhood and equality, which he aimed to achieve under his motto of "Faith, Unity, and Discipline." In the wake of his death, Jinnah's successors were tasked with consolidating the nation of Pakistan that Jinnah had so determinedly established.

15 September

INTERNATIONAL DAY OF DEMOCRACY

Democracy is a universal value based on the freely expressed will of people to determine their own political, economic, social and cultural systems and their full participation in all aspects of their lives.

The UN General Assembly encouraged Governments to strengthen national programs devoted to the promotion and consolidation of democracy, and also decided that 15 September of each year should be observed as the International Day of Democracy.

The ability of people to raise their voices and decide how they are governed lies at the heart of democracy. The Inter-Parliamentary Union is promoting the International Day of Democracy through its Member Parliaments in 162 countries around the world.

Rooted in sports, SZABIST Sports Society has been recognized and celebrated on both regional and national level. From cricket to basketball, tennis to throw-ball, they just don't play it, but have won it all. Being the Best Society runner-up twice, SSS has made its mark in SZABIST not only in the sports field, but also in having one of the most energetic and active team built-up by students belonging to distinctive academic backgrounds.

The purpose of SSS is not only to play sports on different levels, but also to promote sports among students. For the purpose of which, team SSS has planned some amusing sports events which would be carried on throughout the year to keep the students engaged in athletic activities and also to lighten-up tight SZABIST schedules and kill some academic pressure. The events won't be let alone filling the purpose of recreational sports activities, but shall be as well promoting the passion for sports and provide a platform to people all over Karachi to participate and showcase their sporting talent to the world.

Starting from September, before societies' fair, SSS will be holding trials for cricket, football, volleyball, throwball and table tennis and everyone who is not even a SSS member, is encouraged to apply. Players would be selected from trials and then our sporting 2014-2015 will be formed. Of course, it's a chance for freshmen, especially, to attend the trials and be a part of one of the most exciting societies of SZABIST. Later in September, SSS's incredible SLOC (SZABIST League Of Champions) will return. And trust me, you don't wanna miss it!

Later this semester, SSS has some more events designed for you including Inter-University Tournaments, Girls Sports League and, the one I love most, SZABIST Football Premiere League! And oh, SSS of course also arranges screening for cricket and football tournaments. They sure know how to keep their audience happy!

Stay connected for more updates on SLOC!

BUGATTI VEYRON

Piloting the world's fastest convertible is a trip at \$2.1 million and 253 miles per hour. The English language stumbles and falls notably short when attempting to describe the sensation of "acquainting" oneself with the Bugatti Veyron 16.4 Grand Sport and its 16-cylinder, eight-liter engine. It is a vicarious thrill, one too fast for the language of Chaucer and Shakespeare.

Upon summoning the full weight of the Veyron's 1001 break horsepower for the first time, the force is so violent that the mind becomes deliriously blank. Time and space is distorted in a way that only has precedent for astronauts upon lift-off or Formula 1 drivers leaving the grid. You feel as though you're perhaps having an out-of-body experience or being sucked out of a jet plane. It's a rush. Central to all this is the stability afforded by the four-wheel-drive Haldex traction control system,

BUGATTI VEYRON

which allows this monumental power to be fluidly and efficiently put down on the tarmac. To build the Grand Sport, billed not incorrectly as "the ultimate open-top sports car," Bugatti reappraised the initial Veyron's structure in order to transform it into an open tourer and used carbon fiber to ensure that it suffers from less torsional flexing than any other roadster. What this means is that the driver is free to enjoy the manifold pleasures of cruising with the roof off—a two-person job to remove but a simple and swift job nonetheless—safe in the knowledge that the Grand Sport is a class leader in crash performance for convertible sports cars - Speed on.

The Grand Sport, with the roof off, adds a tremendously visceral aspect to the driving experience as the engine and air intakes are only inches away from your head—the turbos greedily gurgling away, a constant reminder that you are piloting something between a plane, a college education and a Formula 1 car. And should you be caught out by the weather, the Grand Sport conveniently carries an umbrella-like soft top that neatly occupies the space normally inhabited by the roof, though you will be limited to 80 miles per hour once this is in place. Still, not bad for a rainy day.

MALAYSIA DAY

Malaysia is a federal constitutional monarchy located in Southeast Asia. It consists of thirteen states and three federal territories and has a total landmass of 329,847 square kilometers (127,350 sq. mi) separated by the South China Sea into two similarly sized regions, Peninsular Malaysia and East Malaysia. Peninsular Malaysia shares a land and maritime border with Thailand and maritime borders with Singapore, Vietnam, and Indonesia. East Malaysia shares land and maritime borders with Brunei and Indonesia and a maritime border with the Philippines. The capital city is Kuala Lumpur, while Putrajaya is the seat of the federal government. In 2010, Malaysia's population was 28.33 million, with 22.6 million living in Peninsular Malaysia. Malaysia is one of 17 mega-diverse countries on earth, with large numbers of endemic species.

The country is multi-ethnic and multi-cultural, which plays a large role in politics. The constitution declares Islam the state religion while protecting freedom of religion. The government system is closely modeled on the parliamentary system and the legal system is based on common law. The head of state is the king. He is an elected monarch chosen from the hereditary rulers of the nine Malay states every five years. The head of government is the Prime Minister.

Since independence, Malaysia has had one of the best economic records in Asia, with GDP growing at an average 6.5% per annum for almost 50 years. The economy has traditionally been fueled by its natural resources, but is expanding in the sectors of science, tourism, commerce and medical tourism. Today, Malaysia has a newly industrialized market economy, ranked third largest in Southeast Asia and 29th largest in the world. It is a founding member of the Association of Southeast Asian Nations, the East Asia Summit and the Organization of Islamic Cooperation, and a member of Asia-Pacific Economic Cooperation, the Commonwealth of Nations, and the Non-Aligned Movement.

MALAYSIA DAY

According to the Population and Housing Census 2010 figures, ethnicity and religious beliefs correlate highly. Approximately 61.3% of the population practice Islam, 19.8%, practice Buddhism, 9.2% Christianity, 6.3% Hinduism and 1.3% practice Confucianism, Taoism and other traditional Chinese religions. 0.7% declared no religion and the remaining 1.4% practiced other religions or did not provide any information. The official language of Malaysia is Malaysian, a standardized form of the Malay language. English remains an active second language and serves as the medium of instruction for math and sciences in all public schools. Many other languages are used in Malaysia, which contains speakers of 137 living languages. Chinese Malaysians predominantly speak Chinese dialects from the southern provinces of China. The more common dialects in the country are Cantonese, Mandarin, Hokkien, Hakka, Hainanese, and Fuzhou. Tamil is used predominantly by Tamils, who form a majority of Malaysian Indians. Other south Asian languages are also widely spoken in Malaysia.

Malaysia Day is held on 16 September every year to commemorate the establishment of the Malaysian federation on the same date in 1963. It marked the joining together of Malaya, North Borneo, Sarawak, and Singapore to form Malaysia. The formation of Malaysia was made possible through the introduction of the Malaysia Bill to the Malayan Parliament on 9 July 1963. Since 2010, Malaysia Day has been a public holiday. Prime Minister of Malaysia Najib Razak made the decision after a question-and-answer session at the Malaysian Parliament on 19 October 2009. This means Malaysians have two celebrations related to Malaysia's independence.

ASH RESHTEH

Ash Reshteh is one of the most popular varieties of Ash (thick soup) in Iran. Try out this traditional dish which is packed with healthy fresh vegetables and beans.

Ingredients

2 tbsp. vegetable oil
1 tsp. coriander powder
50 g celery
Pinch black pepper
50g g brown lentils
beans, (drained weight)
80 g egg noodles, dried
1 onion, finely sliced

1 onion, chopped
½ tsp. cumin powder
16 g spinach leaves
20 g fresh parsley, chopped
1 liter water
130 g canned chickpeas, (drained weight)
4 tbsp. crème fraîche, half fat
1 garlic clove, finely chopped

2 tbsp. garlic paste
½ tsp. turmeric powder
½ tsp. salt
15 g fresh coriander, chopped
120 g canned red kidney
1 tbsp. vegetable oil
1 tsp. dried mint

Healthy Hints

This soup is a meal in itself: you get high fiber protein from the beans and lentils, carbs from the noodles and a helping of healthy green vegetables from the celery and spinach. Although it is finished off with crème fraîche and fried onions, the calories are surprisingly low for a main meal.

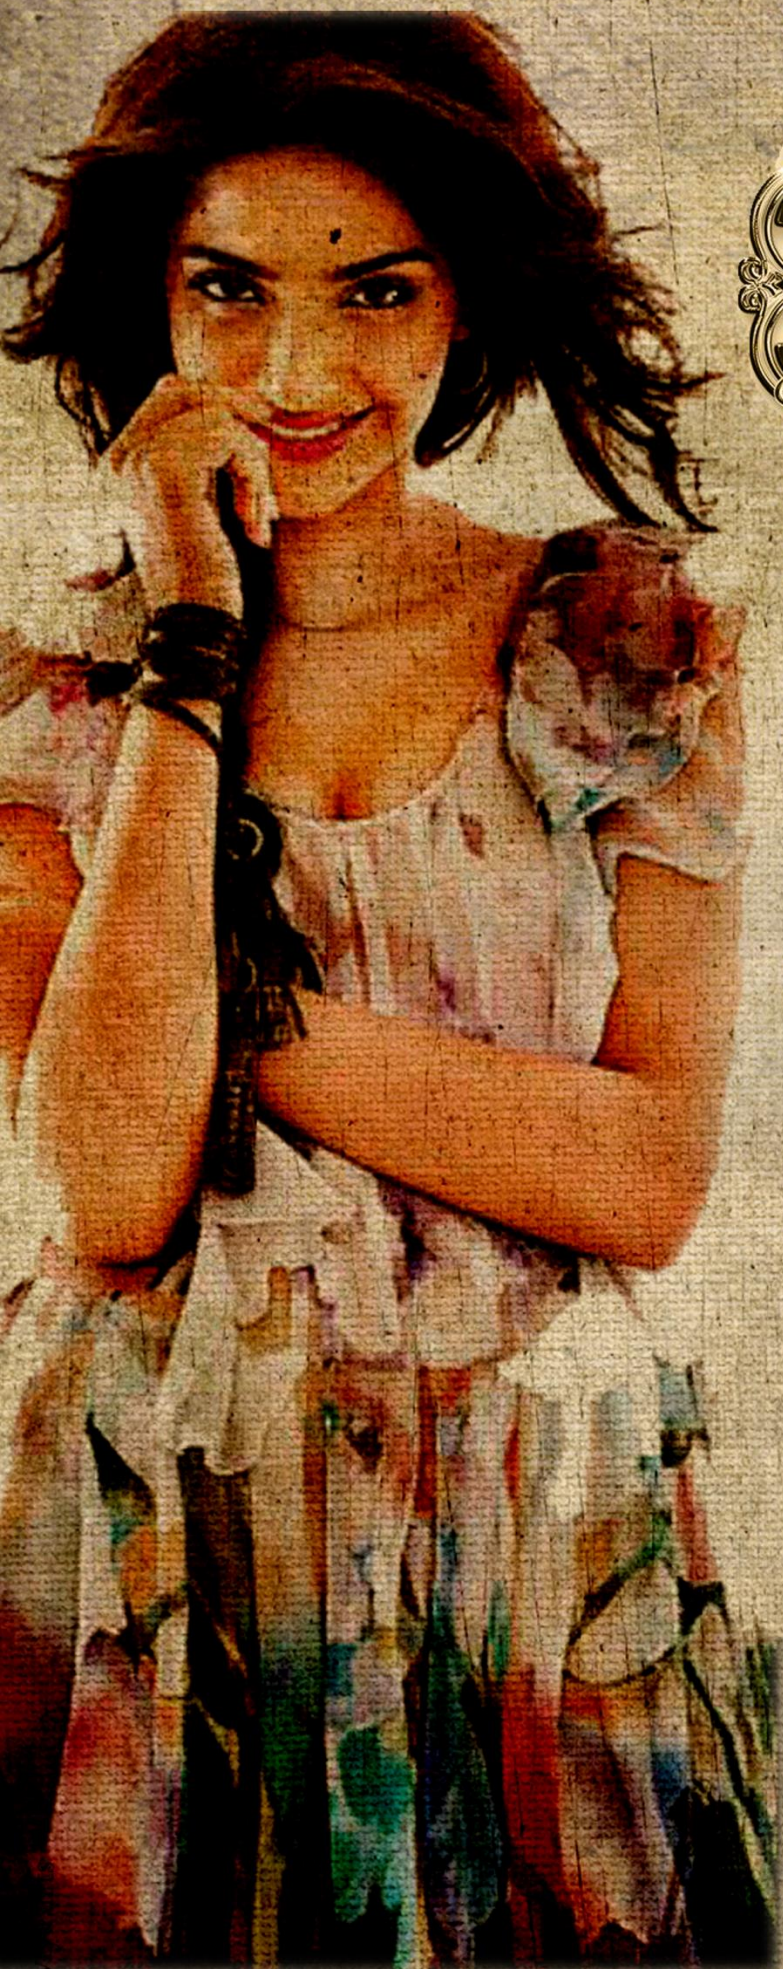

Cooking Guide

1. Heat the oil in a large saucepan over a medium heat and fry the onions until golden brown.
2. Add the garlic and spices and fry over a low heat for a further 1 minute.

ASH RESHTEH

3. Add the vegetables, salt and pepper and cook for 5 minutes.
4. Add the parsley, coriander, lentils, water and bring it to the boil over a high heat. Reduce the heat, cover and simmer for 40 minutes.
5. Add the kidney beans and chick peas, cover and cook for 30 minutes on a low heat.
6. Add the dry noodles, cover and cook for a further 20-30 minutes on a low heat until the noodles are cooked. Stir occasionally to keep the noodles from sticking to each other. If the consistency is too thick, adjust by adding some water.
7. Stir in the crème fraîche and pour the soup in individual bowls
8. For the garnish, heat the oil in a pan and fry the onions over a medium heat until golden brown.
9. Add the garlic and fry for 2 minutes. Stir in the dried mint and remove from the heat.
10. Spoon the garnish over the soup and serve.

Disney KHOOBSURAT

khooobsurat (Beautiful in English) is an upcoming 2014 Hindi romantic comedy film. The film is directed by Shashanka Ghosh and produced by Rhea Kapoor, Anil Kapoor and Siddharth Roy Kapur. It stars Sonam Kapoor, debutant Fawad Afzal Khan, Kirron Kher, Prosenjit Chatterjee, Ratna Pathak and Aamir Raza Hussain in lead roles. It is a remake of the 1980 film of the same name.

The film is set to release on September 19, 2014.

Dr. CABBIE

Heals on
Wheels

Dr. Cabbie is an upcoming 2014 Canadian film that stars Kunal Nayyar, Vinay Virmani, Isabel Kaif and Adrienne Palicki. The film is directed by Jean-Francois Pouliot and co-produced by Bollywood actor Salman Khan. The story revolves around a newly arrived immigrant doctor in Canada who cannot get a job and is forced to become a taxi driver. He becomes a local hero when he converts his taxi into a mobile medical clinic.

The kolibree toothbrush has an accelerometer, a gyroscope, and a magnetometer inside, which it uses to record how long you brush your teeth for, and how you brush them. It can show you live information on how you're doing so you can adjust your brushing technique, or simply brush for longer.

Or it can sync that information with a phone app to give you a running total of how well you've brushed. You end up looking at a screen that gives you a score out of five that's based on how long and well you've cleaned your teeth.

		Check regularly Monitor brushing times Track forgotten teeth	
<p>1/ track your toothbrushing habits</p>	<p>2/ Auto-syncr your data by Bluetooth</p>	<p>3/ Check your progress on mobile apps</p>	<p>4/ take care. keep smiling.</p>

Google GLASS

Enabling you to interact with the world around you in a totally different way, Google Glass lets you get info from the web and take pictures using voice commands. You just might look an idiot wearing a pair in the next 12 months, before it takes off and everyone has them. These futuristic specs are currently in Beta with some high profile geeks posting pictures of them wearing a pair on their Twitter accounts.

xaviya arts

Hello There! How does it feel to go to a new school with some familiar faces and many not. You've finally chosen your life's path and you're good to-go. Did mixed emotions get into your skin, nervousness and excitement at the top, and the sense of both thrill and anxiety hit you from the beginning? Isn't that an amazing-scary feeling when insanity strikes a little with jitters?

The university has already begun and for most of you must have already made new friends and some might have not. Though it's off topic, but Hey, did anyone of you have any class cancellations on the very first day of that course? Yes-No? We hope NOT. Take it from us, that totally sucks. And how many of you visited the Lions Club Help Desk specially set-up to cater your first-day-at-school problems? We hope all of you!

Welcome to **LIONS CLUB** **SZABIST**

We, at Lions Club, just don't help the society with our philanthropic activities, but also look after our fresh-men in assisting them in whatever they need! We aint big-scary lions but we sure rule like them and whenever our people are in need, we make sure to take all possible measures to help them. Whether it's with freshmen in university or problem faced by society at large, we're internationally acknowledged to cater to the world in their every social need.

With warm-hearted wishes, Lions Club welcomes you to the most kick-ass phase of your life which shall be forever cherished later. It will be roller coaster ride full of emotions and academic bumps where fun is promised at every move. We assure to help you ground your feet and promise hospitality for all of you at all possible levels. We want you to know that you can always look up to us for any help any time. We aim to ease your stay with us.

Cheers!

The Maze Runner is an upcoming American science-fiction action thriller film based on a 2009 book 'The Maze Runner' by James Dashner, directed by Wes Meery from a script by Noah Oppenheim.

The film stars Dylan O'Brien, Kaya Scodelario, Thomas Brodie-Sangster, and Will Poulter. The film is set to be released on September 19 2014 in the United States by 20th Century Fox.

THE MAZE RUNNER

Finding Fanny is an upcoming English/Hindi satirical film, directed and written by Homi Adajania and produced by Dinesh Vijan under Maddock Films and presented by Fox Star Studios.

Naseeruddin Shah, Dimple Kapadia, Pankaj Kapur, Deepika Padukone and Arjun Kapoor will feature in prominent roles. The film is based on a road trip set in Goa and follows the journey of five characters.

Finding

Fanny

The film will premiere in India on August 25, 2014 and is scheduled for release worldwide on September 12, 2014.

FIFA 15

FIFA 15 is an upcoming football simulation video game developed by EA Canada and published by Electronic Arts. It has been announced for release on September 23 (North America), 25th (Europe) and 26th (UK) 2014 for the PlayStation 3, PlayStation 4, PlayStation Vita, Xbox One, Xbox 360 and Microsoft Windows.

New features in this edition include realistic emotional intelligence, practical team tactics, vivid living pitch, lively player visuals, and Man-to-Man battles.

Madeeha Basheer currently holds the office of Key Accounts at Nestle Pakistan. Additionally she was also associated with ZABFM 106.6 for more than three years while pursuing her BS in Media Sciences from SZABIST Karachi. Furthermore she was also a part of 2012 graduating class of MBA from SZABIST Karachi. While discussing about Madeeha Basheer's educational life, she repeatedly insisted on breaking the stereotype that studying from schools with gigantic reputation positively dedicates your future. She emphasized on the need to acknowledge the fact that it is largely the individual's part to make or break itself. Another important point of discussion in her interview was the difference in educational and professional world. She recurrently asserted the fact that professional exposure during the studies is the best way to ensure a smooth and steady transition into the REAL world. She guided the current students "Go out in the world; see how things work; listen to the world; only then you will get to expand your vista to the world". On her approach towards the prospect of being happy everyday she stressed on acquiring positivity from the environment. She asked the people to pick and focus on positive attributes from the people we meet every day. She described it as a technique she employs too. When she was asked about the dynamics of the jobs she used to do before her current position she mentioned that she was not a highly paid but she used to love her work and the learning opportunities her job gave. She maintained that money is not the only aspect one should look in the job, sometimes the prospects the job has to offer surpasses the aspect of money. She mentioned that eventually due to her vast experience and dedication she flourished in her job.

Entrepreneurism

Shayaan Tahir currently holds the office of CEO at Pakistan's E-Commerce giant 'HomeShopping.pk'. Additionally he is also a trained pilot and has experience in sales and marketing. Shayaan Tahir described that the basis of his business venture of online shopping lies primarily on the foundation of honesty as trust is what a Pakistani Internet user is always looking for while shopping via e-commerce. He repeatedly asserted it as one of the very difficult attribute to obtain from their customers but once obtained certainly goes a long run. Shayaan Tahir, while remembering his early day, designated the vacuum present in the area of online shopping as his entrepreneur click. He said when he was looking for certain products to buy on the web there was no place to look except international online markets. Consequently his dedication, hard work and computer science education was all it took to launch this venture. While discussing the benefits and future of online shopping he asserted that the volume of products dealt by his organization every day is amply over the capacity a retail shop would manage to deal. Additionally the investment for startup of an online store is well beneath the input required for a shop. He maintained that online shopping can be the new face of success as rural or remote areas are always in a search of trustworthy suppliers and are willing to play a price. He mentioned that his family background was aloof from business and was oriented towards professionalism and jobs. This was described by him as one of the hurdles to overcome. Furthermore going into a field never spoken in Pakistan before was another of the obstacle he had when he launched his venture. These along with other barriers worked as motivation to spark entrepreneurship in him.

Conclusively like every enthusiastic entrepreneur Shayaan Tahir asserted his customers to be his main strength and his true marketers cum advertisers. For his future he described his thought to hold the status of giant of e-commerce in Pakistan and plan to expand his market to Middle East and Far East.

Typhoid Fever

Typhoid fever is an infectious disease caused by *Salmonella typhi* bacteria. Typhoid fever is rare in industrialized countries. However, it remains a serious health threat in the developing world, especially for children.

The bacteria that cause typhoid fever spread through contaminated food or water and occasionally through direct contact with someone who is infected. In developing nations, where typhoid is endemic, most cases result from contaminated drinking water and poor sanitation. The majority of people in industrialized countries pick up the typhoid bacteria while traveling. The disease is endemic in India, Southeast Asia, Africa, South America and many other areas. If you live in a country where typhoid fever is rare, you're at increased risk if you:

- Work in or travel to areas where typhoid fever is endemic
- Work which include handling *Salmonella typhi* bacteria for e.g. as a clinical microbiologist
- Have close contact with someone who is infected or has recently been infected with typhoid fever
- Have an immune system weakened by medications or diseases such as HIV/AIDS
- Drink water contaminated by sewage that contains *S. typhi*

Once infected, patient is likely to experience all or some of these symptoms:

- Fever often to as high as 103 or 104 F
- Headache
- Weakness and fatigue
- Dry cough
- Loss of appetite
- Abdominal pain
- Diarrhea or constipation
- Rash

The most serious complication of typhoid fever – intestinal bleeding or holes (perforations) may develop in the third week of illness. About 5 percent of people with typhoid fever experience this complication. Other possible complications include:

- Inflammation of the heart muscle (myocarditis)
- Inflammation of the lining of the heart and valves (endocarditis)

Typhoid fever

- Pneumonia
- Inflammation of the pancreas (pancreatitis)
- Inflammation of the gallbladder (cholecystitis)
- Kidney or bladder infections

In many developing nations, the public health goals that can help prevent and control typhoid may be difficult to achieve. For that reason, some experts believe that vaccinating high-risk populations is the best way to control typhoid fever. Two vaccines are available:

- One is injected in a single dose about two weeks before exposure.
- One is given orally in four capsules, with one capsule to be taken every other day.

Neither vaccine is 100 percent effective so consequently both require repeated immunizations as vaccine effectiveness diminishes over time. Other preventive measures include washing your hands, avoiding drinking untreated water, avoiding raw fruits and vegetables, and eating properly cooked food.

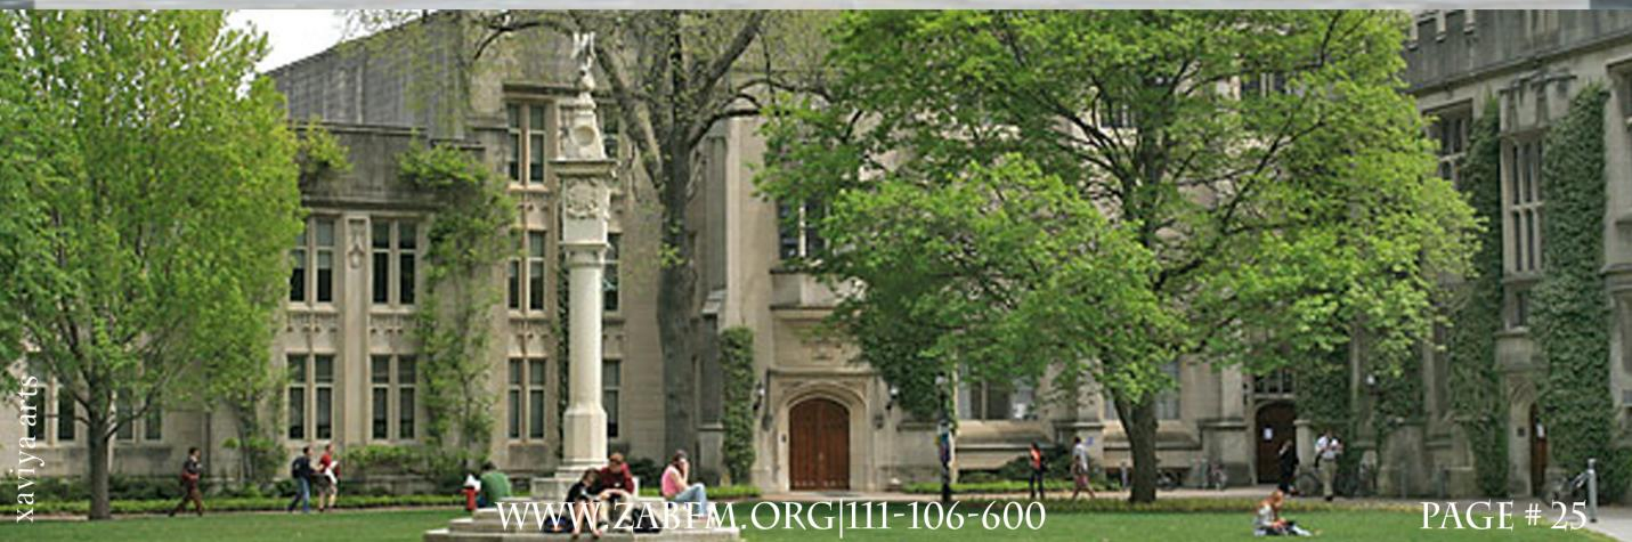

PRINCETON UNIVERSITY

Princeton University is a private Ivy League research university in Princeton, New Jersey. Founded in 1746 in Elizabeth as the College of New Jersey, Princeton is the fourth chartered institution of higher education in the American colonies. The institution moved to Newark in 1747, then to the current site nine years later where it was renamed as a University in 1896. Princeton's undergraduate program is highly selective, admitting 7.28% of undergraduate applicants in the 2013-2014 admissions cycle. The Graduate School has about 2,600 students in 42 academic departments and programs in social sciences, engineering, natural sciences, and humanities. In 2012-13, it received over 11,000 applications for admission and awarded 319 Ph.D. degrees and 170 final masters' degrees. From 2001 to 2013, Princeton University was ranked either first or second among national universities by U.S. News & World Report (USNWR), holding the top spot (sole or tied with Harvard) for 11 of those 13 years,[112] and was ranked #1 again for 2014. Additionally, with an endowment of US\$17.1 billion, Princeton University is among the wealthiest universities in the world. Ranked in 2010 as the third largest endowment in the United States, the university has the greatest per-student endowment in the world (over US\$2 million for undergraduates).

Princeton has been associated with 36 Nobel laureates, 17 National Medal of Science winners, two Abel Prize winners, five Fields Medalists, nine Turing Award laureates, three National Humanities Medal recipients and 201 Rhodes Scholars. Four Presidents of the United States have had connections to Princeton. Princeton alumni and former students have served as heads of government in Bangladesh, Belgium, Peru, Senegal, and South Korea. Notable graduates of Princeton's School of Engineering and Applied Science include Apollo astronaut and commander of Apollo 12 Pete Conrad, Amazon CEO and founder Jeff Bezos, and Google executive Eric Schmidt.

SZABIST STUDENT COUNCIL

Wow! Marvelous! Exceptional! Outstanding! Tremendous! Couldn't get any better! These were the words of freshmen after experiencing the two events held by SSC in the month of August which went over a big success, blew their minds and proved to be the finest in the history of SSC.

In order to mark official entry of batch 2018, SZABIST, with the cooperation of SSC, arranged an outstanding orientation ceremony to welcome their freshmen in the best possible manner; venue was SZABIST to let nascent students get enough cognition about campuses. Speaking of orientation day, a day well-known to be spent listening to speeches by school's administration where they tell freshmen about the rules and regulations to be followed and things one should and shouldn't do and many other not-so-entertaining things, is the unofficial first day of your new school. Not only do you learn basic stuff about your new school, but also you get the feel of how next four years of your life are going to be like.

The day was well planned and well executed by the members of SSC who were present from 9 in the morning to 7 in the evening for assisting freshmen. And yes, like many other things they do to save souls, they also managed to keep the speech part as less as they could. In the first half, all the necessary information was shared separately by the department heads of each department and later freshmen, divided in groups, were taken on campus tour by SSC representatives.

All the queries and confusions were also later entertained from the freshmen by SSC representatives to further smooth things out for them.

Following it, the other event which beat the drum and turned SZABIST green was the festivity of Independence Day. The atmosphere was full of patriotism and the aspect of freedom was sky high.

The green colored water of fountain at 100 campus' entrance, the white and green ribbons tied around students' wrist, green poster paint on girls' cheeks, ooh yes, SZABIST has never looked more beautiful. The event was covered by different news channels, the main one being "Capital TV."

The event had many exciting activities starting off with the photo booth ready with props in the afternoon. With the green and white dress code everyone looked amazing and the pictures turned out to be pretty good. The next activity started which included dipping hands in green paint and printing them on a white banner and giving short freedom messages.

SZABIST STUDENT COUNCIL

Green ribbons, flags and stickers were being distributed by the volunteers to the students. Then the human flag was formed at 100 courtyard in which students' showed their love, solidarity and respect for their country. This activity was the most challenging one because the arrangement of the human flag had to be just perfect. A lot of volunteers for the flag and put their unlimited effort to make it possible, photographers taking the picture and one can proudly say that activity went just beyond words. The event reached its peak when the EB announced that they have a little surprise arranged for everyone. The level of excitement rose among the students even more and I could hear chattering asking each other what the surprise might be. The surprise was to be given after the flag hosting ceremony and the cake cutting ceremony in which the Vice Chancellor and President of SZABIST would come as special guests. The event was top notch and I can clearly state this when we came to know about the surprise. We had fireworks arranged by the EB for the students. It was an amazing sight. The ceremony ended with the national anthem and green and white bunch of helium balloons was flown up in the sky by the volunteers. It wouldn't be wrong to say that the secret behind these events' success was the back-breaking efforts of SSC team which showed the squad work by contributing their 100% to make these activities more flamboyant, grandeur and unforgettable.

Serve.

Learn.

Change.

'It always seems impossible until it's done'
- Nelson Mandela

Stand up for a cause
Volunteer your time and skills
Your effort counts!
